A large silhouette of an oil pumpjack against a blue sky with a gradient from light to dark. The pumpjack is the central focus, with its long arm and counterweight clearly visible.

# Electronic Document Storage & Records Management System: *Producer Focus*

*Simplify Your World*

**YOUR INFORMATION. YOUR WAY. TODAY.**

# dsEXECUTIVE KEY FEATURES

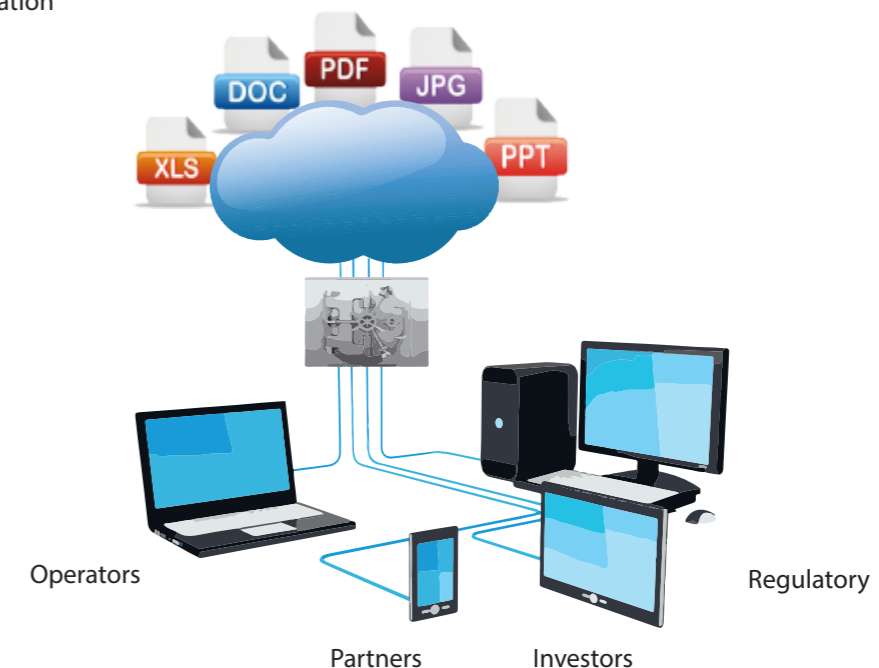

dsEXECUTIVE is a fully integrated Electronic Content Management system that is specifically tailored to address the needs and challenges of Oil and Gas Producers across North America.

Our solution ensures that throughout the life-cycle of your well that all data requirements are fully managed.

Designed to optimize security for its users, dsEXECUTIVE ensures information is safely communicated between employees, partners and clients. Eliminating the need for time consuming faxes, emails and phone calls, dsEXECUTIVE simplifies and safeguards documents that will ultimately increase work flows and cost efficiencies.

## Electronic Content Management

- dsEXEC maintains a secure environment where vendors can post documents on your behalf, which get shared to both operating and partner companies
- Integrates with third party applications
- All documents pertaining to the well are stored in one location and are transferable at the time of a divestiture
- Ability to upload multiple documents in any format, of any size
- Utilize dsSYNC to retrieve, post or revise documents while off-site, while providing a redundant backup of all critical information
- Customizable folder and hierarchy structures unique to your companies needs
- Simple revision controls
- Retire documentation at the time a retention date is reached, while maintaining full auditability of the information
- Search and sort tools for documentation
- Folders and files can be set up for private or shared access dependent on level of authorization

Drilling	Completions	Production	Abandon & Reclamation
AFE's	All Vendor Company Files	Daily production	Daily reports from Service Companies
