dsEXECUTIVE is a fully integrated Electronic Content Management system that is specifically tailored to address the needs and challenges of Oil and Gas Service Companies across North America. Our solution ensures that all your data requirements are efficiently optimized and fully managed.

Designed to optimize security for its users, dsEXECUTIVE ensures information is safely communicated between employees, project owners and all invested parties. Eliminating the need for time consuming faxes, emails and phone calls, dsEXECUTIVE simplifies and safeguards documents that will ultimately increase work flows and cost efficiencies.

Electronic Content Management

- dsEXECUTIVE maintains a secure environment where information is able to be shared amongst employees, project owners and invested parties.
- Certificate of Reconnition (COR) documents are easily placed in a secure detailed file structure with the ability to share internally and externally for auditing purposes and to ensure compliance.
- All documents pertaining to the well are stored in one location and are transferable at the time of a divestiture.
- Ability to upload multiple documents in any format, of any size.
- Utilize dsSYNC to retrieve, post or revise documents while off-site, while providing a redundant backup of all critical information.
- Customizable folder and hierarchy structures unique to your companies needs.
- Simple revision controls.
- Retire documentation at the time a retention date is reached, while maintaining full audibility of the information.
- Search and sort tools for documentation.
- Folders and files can be set up for private or shared access dependant on level of authorization.
- Secure retrieval options.
- Allow vendors to post invoices to securely shared folder.
- Fully supported and managed by our dsEXEC Customer Experience Specialists.
